Note:

\*) The results described in this report only apply to the samples analyzed, n.d. = not detected = <LOD = Limit of Detection.

\*\*) CBDA - For the calculation of the equivalence totals, the respective acid forms were multiplied by the factor 0.877 or 0.878 in order to deduce the equivalent amount of the neutral form. Analysis method: HPLC-DAD (High Performance Liquid Chromatography - Diode Array Detector). All measurement methods were calibrated and checked with certified reference materials (CRM).
